Kate Scarboro

Charlotte, NC | scarboro.kate@gmail.com | (919) 805-6711 | kate.is-a.dev

SUMMARY

Computer science master's student graduating December 2026, with experience in Python, SQL, data-driven applications, and online math tutoring. Builds tools that make complex information easier to understand and brings experience adapting explanations to individual learners.

EDUCATION

University of North Carolina at Charlotte

M.S. Computer Science | Expected December 2026

B.S. Computer Science | 2024

TECHNICAL SKILLS

Programming & data: Python, SQL, pandas, scikit-learn

Tools: Git, Power BI, DAX

Focus: Data visualization, predictive modeling, analytical problem-solving

PROJECTS

Food Establishment Risk Dashboard | Power BI, DAX

- Built an interactive dashboard using Mecklenburg County restaurant inspection records to help users identify establishments that may require earlier attention.
- Created a DAX risk score using recent inspection scores and trends, separating current performance from predicted decline.
- Added geographic mapping to show clusters of higher-risk establishments; refined labels, colors, and information hierarchy based on usability feedback.

Predicting Inspection Outcomes with Machine Learning | Python | In progress

- Preparing public inspection and violation histories and engineering features from inspection patterns to estimate compliance risk.
- Evaluating classification approaches for detecting higher-risk establishments and comparing results with published methods.

EXPERIENCE

Online Math Tutor | Thinking Feet | Remote | Sep 2023 - Jul 2024

- Adapted math explanations to student confusion and broke technical concepts into clear, step-by-step instructions.

Batch Cook | CMS Cafeteria | Charlotte, NC | Aug 2024 - Jun 2025

- Coordinated timing across multiple tasks during service in a fast-paced cafeteria environment.

TRAINING & PROFESSIONAL DEVELOPMENT

AWS Academy Data Engineering | In progress; expected December 2026

DataCamp - Completed courses: A/B Testing in Python; Introduction to GitHub Concepts; Machine Learning with PySpark; Explainable AI in Python; Introduction to Regression with statsmodels in Python.
